Eustace Crentsil

Web developer · Project manager · AI automation

Accra, Ghana · eustaceocrentsil@gmail.com · +233 54 649 6092 · linkedin.com/in/eustace-crentsil · eustacecrentsil.vercel.app

PROFILE

Web developer and project manager who builds websites, web applications and AI automation for businesses. As Co-Founder of Clottware, Inc., coordinated 5–8 concurrent projects, introduced Agile processes that reduced delivery time by 30%, and increased client retention by 60% after deploying new client management features. Most recently a remote freelance Content Migration and QA Analyst and an AI Trainer (QGIS Expert) for micro1. Holds ALX Africa certificates in Front-End and Back-End Web Development and an Asana Workflow Specialist certificate, with an earlier career in geology and applied geophysics.

EXPERIENCE

Content Migration and QA Analyst · Freelance, Confidential Client (Remote) — Apr 2026 – Sep 2026

- Reviewed every newly migrated web page against defined quality standards using a checklist-driven QA process before publishing approval.
- Checked page structure, URLs, code, images, tags, keywords and internal and external links; ran cross-browser and device checks.
- Verified SEO elements (H1 headings, title tags, meta descriptions, image alt text) and optimised images for quality and performance.
- Performed code reviews of migrated pages, checking HTML and CSS markup and styling for errors and consistency before sign-off.
- Documented refinements and change records page by page in the Content Migration Plan; worked fully remote across time zones.

AI Trainer (QGIS Expert) · Freelance, micro1 (Remote) — Feb 2026 – Mar 2026

- Built end-to-end QGIS projects for AI model training, turning raw data into structured, validated GIS datasets.
- Wrote clear, step-by-step workflows and reasoning for GIS tasks used to train AI models, to detailed quality guidelines.

Co-Founder · Clottware, Inc., Accra — Oct 2023 – Dec 2025

Web development and quality assurance

- Developed and maintained responsive web applications, including a learning management system (LMS), e-commerce platforms and a freelancer hiring system, using HTML, CSS, JavaScript, React, Python, Django, PHP and SQL.
- Managed WordPress and Wix website builds and deployments; deployed and maintained client sites and applications on AWS and cPanel/WHM.
- Ran functional, exploratory, regression and cross-browser testing before deployment; logged and tracked defects in Jira and validated APIs with Postman.
- Diagnosed and fixed bugs in live environments, improving application stability and reducing recurring user issues.

Project and product management

- Accountable for the delivery of approximately 5–8 concurrent projects, coordinating timelines, resources, deliverables and stakeholders from planning to close-out.
- Introduced Agile processes and workflow improvements that increased transparency and reduced project delivery time by 30%.
- Delivered end-to-end product rollouts across four client verticals with a 100% on-time completion rate.
- Translated business goals and client feedback into product roadmaps; ran sprint planning, backlog grooming and milestone tracking.
- Used Asana, Trello, Jira, Slack, GitHub and Notion to manage workflows, track performance and report milestones.

Clients, operations and team

- Primary client contact from pitch through delivery and support; increased client retention by 60% after deploying new client management features.
- Prepared project budgets, tracked budget versus actual and managed vendors, procurement and pricing.
- Recruited, trained and mentored cross-functional team members; delivered IT consulting, user training and technical documentation.
